# Pro Corpus Analyser

### Do you need help with your analysis?

In a couple of minutes, the Corpus Analyser Pro tests the 250 most important health parameters of the body, based on the energetic condition. As a practitioner, you recognize immediately to priorities, without time-consuming tests. You can start immediately with the major problems and achieve fast results with your therapy. For the client, the reporting is transparent, so it also provides motivation to follow your guidelines.

The result of the test functions is clearly displayed: **Green** is ok; **blue** and **yellow** are outside the norm value, **red** is an acute condition.

The measurement includes 250 parameters in 38 groups. For each parameter, an explanation is given and often some general suggestions to solve a problem. You can add your own specific advice to inform your client.

Among other things, the condition of the cardiovascular system, the skeletal system, the functioning of organs, cholesterol, trace elements, vitamins, minerals, fatty acids, trace elements, heavy metals, allergies, etc.

The Corpus Analyser Pro measures the magnetic field of the human cells based on bio-resonance and radionics. An advanced software application analyses the result.

For each parameter, the norm values and deviation are displayed graphically and in numbers. Within minutes, this test gives insight into the shortcomings of the absorption capacity of the client.

After therapy, a comparison module compares the initial test with the results.

### Specifications

Operating system Windows 7-10  
 Communication Port: USB 1.1 / 2.0  
 Dimensions: 16 cm X 10 cm X 2,5 cm  
 Weight 0,4 Kg  
 Environmental Humidity: 10% - 40%  
 Environmental Temperature: 5°C - 40°C  
 Power USB  
 Software language: English  
 Available language: German, Dutch  
 Client database, backup and restore  
 Certification: FDA, CE, ISO 9001  
 Warranty: 12 months

### Accessories

- Build-in software coding key
- Hand probe
- USB cable
- Installation flash drive
- Installation Manual
- Carrying bag

### Reports

Extensive report per function group  
 Comprehensive report of norm deviations  
 Comparative report of measurements  
 Personalization of reports

### Function groups:

- |    |                            |    |                          |
